

## High Performance Doors

Hörmann Flexon LLC  
Buncher Commerce Park  
Avenue C Building 20-A  
Leetsdale, PA 15056-1376

### **Have you heard?**

***"In addition to the Speed-Master® 2600 quality, the main reason for buying these doors is because of their gray color that matches our corporate color, capacity for high cycles per hour and minimum scheduled maintenance."***

Ternium, August 2011

***"Our truck drivers are no longer hitting the doors because they open faster than a regular metal door."***

Ternium, August 2011

***"Ed, you have demonstrated a world class appearance for Hörmann (Flexon) Doors technical support group. Thank you."***

Cameron Valves, July 2011

***"We installed 4 Hörmann Flexon Speed-Guardian™ 4000 doors in our service department and have seen a great benefit in the dependability of these doors. Maintenance has been virtually zero. The speed of the doors has really helped keep the heat in during the winter and the cool in during the summer. The employees and customers really like these doors as well. Their team was great to work with during the planning and installation."***

Rydell Chevrolet Buick GMC Cadillac, August 2011

***"We bought two Speed-Guardian™ 4000 U' s for the insulation value, double pane anti-scratch windows and the advanced technologies over what is available. The competition doesn't even come close."***

Tysinger Motor Company, Inc., April 2011

***"The Hörmann Flexon Speed-Master® 1600 doors have been in for close to a year working flawlessly at my high usage car wash. I looked at other high speed doors but chose the Sped- Masters because of the simplicity of no moving parts and the ease of installation."***

Tysinger Motor Company, Inc., June 2011

***"The door (Speed-Master® 1600 L) is very attractive and runs very smoothly...very low maintenance and easy installation. The operation of this door makes the other doors in our plant look obsolete and it is nice to know that parts are readily available."***

Expock, June 2011

***"...quick access into an air conditioned production area. The doors (Speed-Master® 1600 & 2600) get a lot of use but have proven to be very reliable."***

GMCH, June 2011

***"I am very happy with the product quality (Speed-Master®) and professional representation (of the local dealer)."***

Tom's Snacks, May 2009

***"I am sorry that I didn't make this purchase sooner (referring to the purchase of two Speed-Guardian™ 2000 doors). The Hörmann Flexon team and their dealer network were professional, timely and competitively priced. I will be specifying them again on future projects."***

Thompson Lexus and BMW, September 2009

***"The quietness and the constant reliable performance (of the Speed-Guardian™ door) have been the biggest assets. It is hard to put a number on the energy savings, but I am sure it has made an impact."***

Thompson Lexus and BMW, November 2009

***"The Speed-Commander™ 1400 SE is cycled all day long. I really like the timer function and re-insert. My other doors don't do that!"***

Reeves Brothers, June 2009

***"We have noticed better safety control because of the full-width vision section. The door (Speed-Commander™ 1400 SE) has a quiet operation and its aesthetic appeal matches the architectural design of our new plant. The technology...of the motor, control box and overall design are unmatched. These features comply with our internal requirements of operations and logistics."***

Proctor & Gamble, Colombia, March 2009

***"We are noticing better climate and dust control. The controls and safety devices make this door (Speed-Commander™ 1400 SE) a perfect solution for our application. Everyone is happy with this door."***

Omron Automotive Electronics, March 2009

***"We are impressed with the great tech support from the Hörmann Flexon factory."***
