

# Speed-Commander™ 1400 MP Machine Protection Door

Effectively separate equipment and personnel  
Interior door openings up to 10'0" w x 10'0" h

**HÖRMANN**

# Speed-Commander™ 1400 MP

## Machine protection for openings up to 10'0" w x 10'0" h

### Features

The Speed-Commander™ 1400 MP machine protection door provides peace-of-mind to personnel working in close proximity to production lines, equipment and processes.

The fast opening speed of up to 80 " per second greatly enhances productivity. The Speed-Commander™ 1400 MP works in conjunction with both large and small machinery, in any type of operation including welding and painting, providing an effective barrier between the industrial operation and personnel working in the area.

Class 4 safety switches signal that the door is verified closed so personnel working nearby know that the door is in the closed position when it should be, ensuring that machinery won't operate until they and materials are out of danger.

The sectional panel design is constructed of 58 oz. vinyl material connect with aluminum profiles that allow for fast panel replacement when required.

Smart Start™ NXT, NEMA 4X 3-phase (208 v to 480 v) control box is standard. Connection of accessory components and safety devices is made easy with color-coded plug-in connections and connection cables. This makes installation of initial electrical start-up quick and easy.
