# Speed-Commander™ 1500 Compact High Performance Door

For interior applications - grocery, hospitals, retail, e-commerce and more

# Speed-Commander™ 1500 Compact

## Interior door with innovative tubular drive and aluminum guide tracks

### Compact modern solution for retail, grocery and more

Thanks to anodized aluminum guide tracks and hood, integrated wiring and few visible screws, the SC 1500 Compact has a refined appearance that is well-suited for areas with customer traffic including grocery, retail and hospitals.

Elegant and compact aluminum guide tracks only require 5-½" of clearance on either side of the door opening and a powerful UL rated tubular motor requires very little headroom clearance, enabling the 1500 Compact to fit into even the tightest spaces. The result is streamline and modern-looking.

The door seals extremely well due to the narrow insertion area on the guide tracks where the panel runs inside and guide track draft seals assist with forming a tight seal around the door panel. A fast opening speed of up to 60" per second greatly reduces the amount of air flow between two areas.

Standard are a full-width vision area to provide maximum visibility, and a SoftEdge bottom profile with integral crash switch. If the bottom profile is pushed out of the guide tracks by a crash, the crash switch sends a signal to the control and the door is stopped immediately. An aluminum bottom bar with breakaway tabs is optional for applications having slightly more air pressure.

As standard, a light curtain is built into the guide tracks and monitors the closing zone of the door up to a height of 8'0", reversing the door if a light beam is interrupted. The risk of damage from a collision is greatly minimized.

More and more installations are requiring that the door control box is installed out of the reach of passersby or completely away from the door in a central location. For these types of applications, our optional remote keypad is the ideal accessory; it allows for the actual door control box to be remotely installed while still having the ability to operate all control functions through a compact, 3" x 5-½" keypad integral on either the left or right guide track at 51" up from the bottom of the track. The same functions performable on the door control box may also be performed on the remote keypad. Initial installation set-up, opening and closing, as well as service and troubleshooting are all done through the remote keypad.

**Stable panel**  
Welded panel with spring steel stiffener

**Tight sealing**  
Narrow guide track panel insertion area and draft seals

**Convenient remote keypad - optional**  
Access control box functions when the control box is remotely installed

**Powerful and compact UL tubular motor**  
Dependable operation for high cycle areas

### Exclusive 2 year - 1 Million cycle warranty

The motor / drive are warranted for 1 million cycles. All other components including the panel and control box are warranted for two years.

## Features

<b>Door type</b>	<b>SC 1500 SEL Compact</b>
<b>Suitable application</b>	<b>Interior</b>
<b>Size range</b>	
Max. width x height with rubber edge	13'0" x 13'0"
